

## FUTURE-READY RESIDENT WINNER FOR VILLAWOOD POSITIVE CHANGE

Villawood Properties is pleased to announce the most recent winner of the Positive Change enviroSTAR program.

A new resident to Villawood's 'Claremont Park' community in Tarneit, Farhana Malek has been awarded \$2000 for utilising Villawood's enviroSTAR 'My Wishlist' to reduce the carbon emissions and water usage in her new home.

The enviroSTAR has been developed as part of Villawood's innovative Positive Change program that encourages buyers to build environment friendly homes.

As part of enviroSTAR, 'My Wishlist' presents a checklist of environmentally sustainable initiatives for new homes, including energy efficient appliances, water saving devices and the use of sustainable building materials.

Recently moving into her new home at Claremont Park, Farhana Malek is excited to be the most recent winner, but more importantly, is pleased her home is now future-ready and friendly to the environment.

" I am personally very concerned about the future of our world and I was really excited with Villawood's Positive Change program. It's a great initiative to help reduce carbon and water usage which is not good for the environment.

" Many of the changes are really easy to do and are a great step for our future – I would encourage other home buyers to do the same in building their home," Ms Malek said.

As part of this Positive Change program two \$2000 prizes are available each month to the Villawood homeowner who saves the most carbon and the most water within their home.
